-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

The elected core is

and

The search of each such core has to be done which is not possible without serious burden.

The above four structures signify a tiny subset of what is embraced by claim 1 which does not include further ring fusions. There are thousands of different cores present in the instant claims

Art Unit: 1624

and these compounds further contain sugars, proteins, nucleic acids, polymers, cells, viruses, etc. which are classified separately and examined by different groups at the USPTO.

Compounds, corresponding compositions, a method of use and a process of making that are of the same scope are considered to form a single inventive concept. The compounds instantly claimed are not so linked as to form a single inventive concept. The compounds are so diverse in scope that a prior art anticipating one compound under 35 USC 102 would not render obvious another compound of the same claim under 35 USC 103. This is evidentiary of patentably distinct and independent inventions.

The requirement is still deemed proper and is therefore made FINAL.

Claims 3, 5, 7, 10, 14, 16-20, 25-32, 34, 35, 41, 51 and 52-55 along with subject matter not falling under elected group I of the remaining claims are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 7/14/04.

Claim Rejections - 35 USC § 112

Claims 1, 4, 6, 8, 9, 12, 15, 21, 36-40 and 42-50 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

i) The groups at R_x are written as compounds and not radicals. Compounds do not have points of attachments. See for example, ester or anhydride. These are classes of compounds. Applicant's intention may be alkoxycarbonyl for ester, but this is not reflected in the claims.

Art Unit: 1624

- ii) Regarding S_C as a "conjugated substance," Applicants response appears to state that a conjugated substance is what is being formed. This definition does not say what S_C is, rather what the compound as a whole is. The variable S_C is still not defined.
- iii) Claim 21 is improperly presented as a composition claim. A composition requires the presence of at least two components (see also claims 36-40). Claim 21 is a duplicate of claim 1.
